高定艺术背景
Haute Douture Art Background

一个好的空间一定有一面能彰显其独特灵魂的墙面，或侘寂空灵、或现代简约、或奢华繁复……
SEED 赛德艺术瓷材从陶瓷材料自身特点入手，开发出针对空间背景墙的产品系统。3D 化的产品形态赋予平面化墙体空间的层次感，模块化的应用形式可以满足更多的个性化定制需求。
我们高定艺术背景系统分 3D 艺术马赛克和 3D 艺术砖两大系列，能适用室内空间各种商业运用场景。

A good space must have a wall that can show its unique soul, or be quiet and ethereal, or modern and simple, or luxurious and complex
Seed side art ceramics has developed a product system for the space background wall based on the characteristics of ceramic materials. The 3D product form gives a sense of hierarchy to the planar wall space, and the modular application form can meet more personalized customization needs.
Our Gaoding art background system is divided into two series: 3D art mosaic and 3D art brick, which can be applied to various commercial application scenarios in indoor space.

3D 艺术马赛克系列
3D ArtMosaic Series

整个系列产品在传统马赛克拼贴的模块化理念之上，利用 3D 数字建模技术赋予模块元素立体感，能更好的利用光影介入产品。
3D 艺术马赛克可以直接利用模块立体效果丰富的光影，直接纯色应用；亦可像传统马赛克一样分色拼贴定制画面。是个性化艺术背景高级定制的优选方案。

Based on the modular concept of traditional mosaic collage, the whole series of products use 3D digital modeling technology to give the three-dimensional sense of modular elements, which can better use light and shadow to intervene in the products.
3D art mosaic can directly use the light and shadow with rich three-dimensional effect of the module to directly apply solid color; It can also be customized by color separation and collage like traditional mosaic. It is the preferred scheme for advanced customization of personalized art background.

粼光
Scale light

“粼光”以楔形为基础，设计出形体互补的 A\B 双形，并用工字贴形式组合的 3D 马赛克。工字错位拼贴，在灯光作用下呈现出轻风过后水面“波光粼粼”的视觉效果。
新版“粼光”增设了原创的卡扣结构，有效解决了老版因为产品缝隙带来的露底问题，细节更为完美精致。

Based on the wedge-shaped shape, "Shimmering light" designs A\B double shape, which is complementary to each other, and combines the 3D Mosaic in the form of I-paste. The i-transposition collage, under the action of lights, presents the visual effect of "sparkling water" after a light wind.
The new version of "Sparkling light" has added the original buckle structure, which effectively solves the problem of revealing the bottom caused by the product gap of the old version, and the details are more perfect and exquisite.

星际系列
Interstellarhexahedron

“星际”用最常规的几何体为基础，通过斜切、拉升的变形手法得到基础颗粒元素。拼贴之后，最大程度把光影融入产品，颗粒之间随着角度的不同即便的统一白色之下，也能相互辉映，折射出如星际般的璀璨光芒。
“星际”系列通过规律铺排，辅以光影效果，可以呈现单色的光影画面；也可以像常规马赛克一样做多色拼画，在色彩之上更添空间感。

"Starcraft" uses the most conventional geometry as the basis, through the oblique cut, pull deformation method to obtain the basic grain elements. After the deformation of particles collage, light and shadow into the product to the maximum extent, with different angles between particles even under the uniform white, can also reflect each other, reflecting the bright light like stars.
"Star" series can present monochrome light and shadow images through regular layout and lighting effects; Also can do like conventional Mosaic much color goes all out a picture, more add dimensional feeling on colour.

蘑菇钉
Mushroom nail

蘑菇头的造型像极了老式城门上的门钉，统一的直径分为高、中、低三种高度，多色拼画随机组合，圆润的颗粒伴随高低不同的起伏使作品更加灵动。
出厂默认安装方式为结构胶预贴于防火板之上，施工现场整板打钉上墙。也可以选配定制螺杆植入每颗“蘑菇钉”，拧入金属洞洞板安装。

The shape of the mushroom head resembles the door nail on the old city gate. The unified diameter is divided into three heights: high, middle and low. The multi-color Mosaic is randomly combined.
The factory default installation mode is that the structural adhesive is pre-pasted on the fireproof board, and the whole board is nailed on the wall at the construction site. You can also choose a custom screw to implant each "mushroom nail" and screw it into the metal hole plate for installation.

3D 艺术砖
3D Art brick

此系列产品利用 3D 数字技术建模，造型多以基础几何形体变形而来，呈现国风、简约等多元风格。
3D 立体的砖面效果给墙面装饰带来更丰富的视觉感受，结合光影效果整体空间层次、质感更为细腻。

This series of products use 3D digital technology for modeling, and the modeling is mostly based on the deformation of basic geometric shapes, presenting a variety of styles such as national style and simplicity.
The 3D three-dimensional brick surface effect brings a richer visual experience to the wall decoration, and the overall spatial level and texture are more delicate in combination with the light and shadow effect.

瓦当
Watang

「瓦当」在中国古代西汉时期，生产了大量的铁制装备，其中就有类似瓦面的弧形铁片，这就是古代战甲的前身。设计师利用这样的造型组合，最终设计出弧形造型的瓦当系列，能运用到各种空间，定制不同的图案，为空间创造另样的氛围。

Eaves tiles in the western han dynasty in ancient China, the production of a large number of iron equipment, which is similar to the tile surface arc plate, this is the precursor of ancient armor stylist USES such modelling combination, finally designed the eaves tiles series of arc shape, can be used in a variety of space, customize different design, for the space to create the kind of atmosphere

波浪折纹六角砖
Corrugated hexagonal brick

「波浪折纹六角砖」瓷砖以等边六角的形状呈现，六角带来的稳定、规整形成让人无法忽视的阵列感。有序排列的立体瓷砖阵列，装饰原本单调的墙体。理性的线条，分割界面，让空间更加丰富具有层次感。光影交错，穿插的变奏简洁而抑扬顿挫，让空间更灵动而变化。

"Wavy folded hexagonal tiles" are presented in the shape of equilateral hexagonal tiles. The stability and regularity brought by hexagonal tiles form an array feeling that can not be ignored. The orderly array of three-dimensional tiles decorates the monotonous wall. Rational lines and split interfaces make the space richer and hierarchical. Light and shadow are interlaced, and the interspersed variations are simple and melodious, making the space more flexible and changing.
